Career Boost with Official EIPACC CDPO Certificate

Unique career opportunities (estimated need for over 1,500,000 CDPOs at global level) in these trying times. Give your career an unprecedented boost, increase your chances on the labor market with this Medior Certified Data Protection Officer course and increase the opportunity for internal growth and make a relatively small investment for your future. This study is also suitable to prepare you to start your own practice as an External Certified Data Protection Officer (CDPO). In the history of privacy and data protection education in Europe, this possibility of obtaining a European validated CDPO certificate on the basis of self-learning was previously not available.

In national, European and international transfers of personal data, the importance of EU validated GDPR certification of privacy and data protection is ever increasing as is the demand for specialists in these fields.

Senior GDPR experts and training staff of the European Privacy Academy (EPA) – based in Amsterdam and Brussels were actively involved in the development of unique European standards. At present Professor drs mr Romeo Kadir, co-founder of the European Privacy Academy serves as President of the Academic Board of the European Association of Data Protection Professionals (EADPP). As a privacy 'ideologist' he firmly believes in the importance of low-barrier access to top-expertise in the field of privacy and data protection.

Set your own time and pace to prepare for your next career-step

Unique career opportunities for students and graduates in these trying times. Give your career an unprecedented boost, increase your chances on the labor market with this Junior Certified Data Protection Officer (CDPO) course with EU validation and Registration and increase the opportunity for internal growth and invest in your future. This study is also suitable to prepare you to start your own External Certified Data Protection Officer (CDPO) Practice. In the history of privacy and data protection education in Europe, this possibility of obtaining a European validated DPO certificate on the basis of self-study was previously not available.

In national, European and international transfers of personal data, the importance of EU validated GDPR certification of privacy and data protection is ever increasing as is the demand for specialists in these fields.

As of September 2020, the estimated 1,500,000 Data Protection Officers (DPOs) required around the globe can rely on a unique certification scheme.

Senior GDPR experts and training staff of the European Privacy Academy (EPA) - based in Amsterdam and Brussels were actively involved in the development of this unique European standard called the EADPP CDPO Certification Scheme, which was guided by the EADPP Certification Committee, chaired by professor drs mr Romeo Kadir, co-founder of the European Privacy Academy and Chair of the GDPR Academic Board. As a privacy 'ideologist' he firmly believes in the importance of low-barrier access to top-expertise in the field of privacy and data protection.

Your Personalized European Data Protection Officer (CDPO) Certificate

This uniquely assembled self-study is certified by the European Institute for Privacy, Audit, Compliance and Certification (EIPACC) entitling the bearer as 'Junior Certified Data Protection Officer (CDPO)'. At the end of this training you will receive an EIPACC Certificate (with European validation) confirming the acquiescence of knowledge as per one or more requirements of the prevalent European CDPO Certification Scheme.

Participants of this self-study will receive a 100% guarantee of obtaining the much aspired EIPACC Certificate with their names as Certified Data Protection Professional (CDPO). Based on this certificate each graduate will be entered into the European Register of Data Protection Professionals (RDPP), the largest European Register of EU certified data protection specialists that is increasingly used by (future) employers for verification and validation purposes. See also: www.gdprcertifications.eu

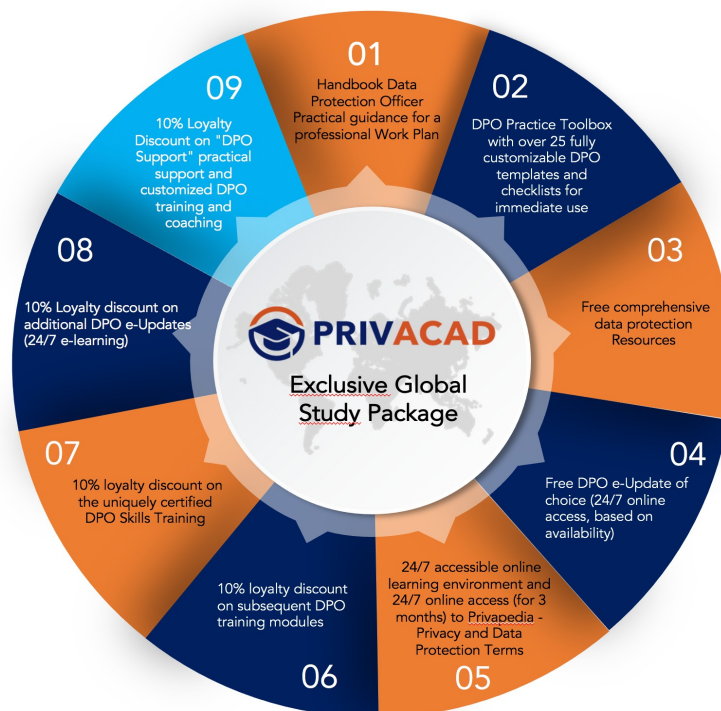

After completion of this certified course you will be able to

1. Carry the title 'Certified Data Protection Officer', in short 'CDPO'
2. Register free of charge (for one year) in the European Register of Data Protection Professionals (RDPP)
3. Enjoy free access to the online Handbook DPO - Guidance for a professional work program (the first European DPO Handbook based on the concept of European Work Program for the DPO)

Career Potential after doing this self-study

- As of September 2020, the estimated 1,500,000 Data Protection Officers (DPOs) who preferably are educated as per European validated certification schemes are in rising demand at national and global levels. This course is especially of value because it is designed under guidance and auspices of the Chairman of the European CDPO Certification Committee of the European Association of Data Protection Professionals (EADPP).
- Day by day every bigger and smaller firms are having dedicated privacy and data protection teams. At present, data protection often gets its standalone practice group or team as it is becoming more complex in this online global economy.
- As more and more social and economic activities have place online, the importance of privacy and data protection is increasingly recognized.
- Of equal concern is the collection, use and sharing of personal information to third parties without notice or consent of consumers. 132 out of 194 countries had put in place legislation to secure the protection of data and privacy.
- Africa and Asia show a similar level of adoption with 55 per cent of countries having adopted such legislations from which 23 are least developed countries.
- At global level there are law firms completely dedicated to practice of privacy and data protection law. They command incredible premium from their clients.
- There are few practices as rewarding as that of privacy and data protection law thanks to deep pocketed and generous clients who are growing fast and do not hesitate to loosen their purse strings to get high quality legal advice and/or representation.

- There will be a growing demand to fill CDPO openings, especially contract positions.
- CDPO recruitment will likely accelerate as from 2021 and on into next as the enforcement deadline fast approaches.
- Being especially true for technology related positions, there is a growing expectation of IT and business staff to take on increased data privacy and protection responsibilities.
- With the focus on hiring information security, compliance and IT staff to support the GDPR regulation, technology capabilities—such as data and records management, process automation and impact assessment tools—become essential to achieving compliance.
- There are many independent technology lawyers catering to startups and SMEs with respect to processing of personal data contracts, tech regulations, investment and advisory work. This work also requires high level of skills and such lawyers make very good money.
- We are yet just scratching the surface. As many data protection laws are still nascent, the tech industry is heavily driven by foreign companies. This is expected to change as indigenous companies are developing and maturing.
- India has world's largest and cheapest technology talent. This is the biggest reason behind inevitable growth of Indian tech industry in years to come. There is a lot to be done in the next 5 years. As a result, certified data protection specialists are on very high demand.
- Government is increasingly empaneling and employing many privacy and data protection specialists as it is entering into various personal data agreements as it is implementing data protection security in various aspects of governance.
